

Zinwave showcasing advanced in-building wireless coverage at MWC 2011

Zinwave shows off its customer project-base and illustrates the profitable route to high-quality, future-proofed in-building wireless

Cambridge, UK – 27th January 2011 – Zinwave, the leader in next-generation in-building cellular and wireless technology, will be exhibiting at Mobile World Congress 2011 in Barcelona, Hall: 2.0, Stand 2G39, from 14th to 17th February 2011.

Senior Zinwave staff will be on-hand to discuss Zinwave's technology, in particular its core product, Zinwave 3000. Zinwave 3000 is an in-building wireless system that is completely standards-agnostic, offering reliable in-building wireless coverage from 150MHz to 2700MHz on one hardware layer.

Zinwave will also be giving out details of its considerable number of current prestigious, large-scale international projects.

Zinwave will be happy to outline the revenue benefits and technical considerations of intelligent in-building wireless, the importance of futureproofing your building against emerging standards, and can discuss some of the current IBW market trends.

One of the 'hot topics' at MWC this year will be LTE, with many operators and building owners concerned about what this new standard means for them. Zinwave will also be ready to discuss the game-changing implications of LTE in the wireless industry. Zinwave will be giving out a free, newly published, LTE whitepaper at the stand. This will aim to remove some of the confusion currently surrounding this standard, and will outline in detail some of the issues surrounding indoor coverage for LTE and how companies can overcome them.

Zinwave will also be hosting a drinks reception at the stand for journalists and customers alike at 18:00 on February 15th. This offers a valuable opportunity to meet the Zinwave team in an informal setting, and to network with other professionals interested in IBW technology.

As a bonus Zinwave will be running a competition whereby visitors to the stand can leave their business cards for a chance to win an iPad. The lucky winner will be notified by 22nd February.

Feel free to visit Stand 2G39. More detailed presentation or interviews are by appointment-only. To arrange this call Alex Perryman on 0208 4088009 or email alexp@eml.com.

About Zinwave

Zinwave is a global technology company with offices in UK, USA and Asia that has pioneered a new approach for reliable multi-service in-building wireless coverage. Zinwave's solution, the Zinwave 3000 wideband active DAS is the only True wideband active Distributed Antenna System (DAS) on the market, covering all frequencies between 150MHz and 2700MHz. Zinwave 3000 provides a highly cost effective multi-service, multi-carrier solution over a single hardware infrastructure that can be quickly and efficiently deployed and easily scaled for future service additions.

Zinwave has a highly experienced RF planning, program management and execution team with extensive experience in all parts of the wireless industry and international telecoms markets.

Sales activity is global with a strong presence across four continents and with relationships established with major well known partners and system integrators. Zinwave's installation base includes customers in the Healthcare, Industrial, Public Venue, Enterprise & Corporate and Education vertical markets.
