

FOR IMMEDIATE RELEASE

Zinwave and Hutton Sign Distribution Agreement for Industry's only True Wideband DAS Solution

Hutton to support increased demand in the US for Zinwave's True Wideband Distributed Antenna System

March 9, 2010, Las Vegas, NV – Zinwave Ltd., a pioneer and leader in next generation in-building cellular and wireless technology today announced a new distribution agreement with Hutton Communications for the US market. Hutton is the leading distributor of in-building wireless solutions in the US and serves wireless carriers, value added resellers (VARs) and Government agencies.

"Our customers have been looking for that one solution that provides ubiquitous wireless coverage inside buildings for multiple simultaneous services and technologies for a long time. Zinwave's Active Wideband in-building solution addresses key coverage challenges in a simple and cost-effective manner and we see great potential for mainstream implementation," John Walker, CEO and President of Hutton Communications stated.

Zinwave provides the industry's only true Wideband Distributed Antenna System (DAS) solution which removes many of the traditional issues and considerations associated with delivering multiple RF services in buildings. It provides simultaneous support for any number or combination of cellular and other wireless services in one unified solution, enabling the addition of new services on demand without the need for costly and disruptive upgrades.

"Hutton Communications is the premier distributor of in-building solutions in the US market and we're very pleased to broaden our market reach and customer support through this partnership," said Jeffery L. Fuller, President of Zinwave Americas. "Hutton's reputation as a leading supplier to the carriers, VARs and public safety markets will benefit our customers through excellent customer support and is a great foundation for the rapid growth we're seeing for our solution in the market place right now," Fuller added.

About Zinwave

Zinwave is a company at the forefront of wireless technology development, pioneering a new approach to in-building unified wireless infrastructure. With unique patented technologies drawn from world-leading research groups at Cambridge University and University College London, Zinwave is today operated by a management team with extensive experience in all parts of the wireless industry and international telecoms markets. The company has developed a Wideband Distributed Antenna System that

addresses the challenges of providing ubiquitous wireless coverage inside buildings for multiple simultaneous services with the same infrastructure and components.

About Hutton Communications

Hutton Communications, Inc. headquartered in Dallas Texas, is a distributor of commercial wireless communications and related equipment. Hutton serves cellular and radio communications dealers, wireless communications carriers and self-maintained end users of communications systems. In addition, Hutton provides its customers with power systems solutions for emergency backup, alternative energy sources, or out-of-grid power requirements. With multiple sales and warehouse facilities, Hutton provides local sales support and fast delivery to your location.
